

# POPULAR SCIENCE

**THE SCOOTER GOES ATV**  
p.82

## What's New THE GOODS

### More than Meets the Eye

**Canon PIXMA iP5000**

>> Most people can't see an ink droplet smaller than two picoliters. This is the first to print at one picoliter, producing super-sharp images. \$200; [usa.canon.com](http://usa.canon.com)

### Toss the Paper

**Mobile NoteTaker**

>> The screen emits an infrared signal that tracks the movement of the pen, recording your scrawls. Stores 50 pages of notes and USB-transfers them to your PC. \$150; [www.nexconcepts.com](http://www.nexconcepts.com)

### Divide and Conquer

**Stanley MaxLife 369**

>> Weather-resistant LED torch runs at the same brightness off three, six or nine AAs. All that changes is the battery life, from 100 to 200-plus hours. \$20; [stanleyworks.com](http://stanleyworks.com)

### A Drill for All Seasons

**Skil iXO** >> Using a 3.6-volt lithium-ion battery keeps it small, provides enough juice for light-duty drilling, and means it'll hold its charge for about two years. Comes with 30-piece bit set. Recharges in three hours. \$50; [amazon.com](http://amazon.com)

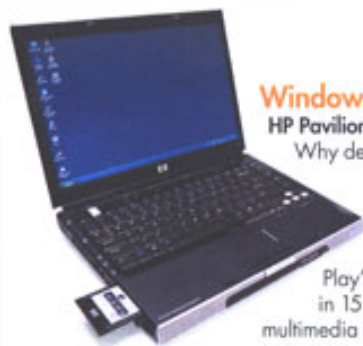

### Fresh Fruit

**BlackBerry 7100t**  
>> Two letters per key keeps it small, and RIM's new predictive text software expands its 35,000-word vocabulary as you teach it your jargon. 32MB memory, four hours' talk time and eight days' standby. GSM. \$200; [blackberry.com](http://blackberry.com)

### Battery in Charge

**Intellicell** >> This battery monitors itself and can activate its backup cell if the main one runs short on juice. When it does run down, it uses a cellular transmitter to call you, letting you know that your car won't start. \$130; [www.reservepowercell.com](http://www.reservepowercell.com)

### Windows Curtain

**HP Pavilion dv1000** >>

Why deal with Windows just to watch a movie? Hit the "Quick-Play" button, and in 15 seconds this multimedia laptop boots into a special mode that only operates the DVD drive. 14-inch WXGA screen. PCMCIA slot hides a remote. \$1,100 and up; [hp.com](http://hp.com)

### Get the LED Out

**Sony QUALIA KSX-46X005** >> The world's most expensive LCD TV is the first to shine LED light through each pixel rather than using fluorescent strips to illuminate the 46-inch screen. The result: truer whites and jacked-up color reproduction—all for a lower energy bill. \$10,000; [sony.com](http://sony.com)
